Subject: Comms Items Week of Oct 22
Attachments: DS-Phthalate exposure and male repro_final.docx; DS-Phthalate temporal trends Reyes_final.docx; DS-Phthalate exposure and metabolic_final.docx; Hexavalent Chromium listserv + tweet text.docx; DS_Cr6 Protocol_v1.docx; Draft factsheet_ChromiumVI_v1.docx

Comms Releases This Week: two phthalate manuscripts have been published, and another has been accepted by the journal (listed below). Because of the subject matter, comms has prepared desk statements to be shared with ORD comms and OPA. Desk statements are attached for Samantha's review.

1. Beth Radke - "Phthalate exposure and male reproductive outcomes: a systematic review of the human epidemiological evidence" in *Environment International*.
2. Erin Yost - "Hazards of diisobutyl phthalate (DIBP) exposure: A systematic review of animal toxicology studies" in *Environment International (to be posted)*
3. Jeanette Reyes - "Temporal Trends in Exposures to Six Phthalates from Biomonitoring Data: Implications for Cumulative Risk" in *Environmental Science & Technology*.

Upcoming Comms Releases:

1. **PFAS materials** - received comments back from fed agencies on the PFAS communications materials. Samantha, Lahne, and I, with OW, are reviewing the comments.
2. **Preparing the Water Quality Climate Review intranet site for public release.** This site was started in 2015 and completed in Feb of 2018, and has been housed on the intranet. Recently, OW has been asking for the intranet site to become public since the data housed on the site supports their decision-making needs. OSIM is currently reviewing the site to ensure that it meets agency web standards before it is sent to IOAA and OPA/Office of Web Communications for review as a new Drupal website. The link to the site is provided for Scot's review. To view the site, log in into Drupal first, **Ex. 6 Internal Link** using your LAN id and pwd. Then click on the link, **Ex. 6 Internal Link**
3. **Cr 6 Protocol** – The FR is with IOAA for review. The comms team is developing a desk statement, Q&As, fact sheet, tweets, and listserv announcement. Draft materials attached for awareness.
4. **FYI -- OAQPS preparing to release Integrated Review Plan for Ozone for public comment in late October.** OAQPS has the lead on this, and there's no NCEA comms coordination role, but we'll be preparing some Qs/As to prep for potential media inquiries.

Media Inquiries and Meeting Requests:

1. Interview with David Bussard and Ted Berner with the Chicago Tribune on EtO is looking like it will happen this Wednesday at 3pm, with a prebrief at 2:45 with OPA and OAR. Waiting for the interview to be scheduled.
2. Sen. Durbin's asked for a meeting to discuss the EtO assessment. The call will be Thursday from 11-1. JOZ, Tina, David, Ted, and Emma will be on the call.

Status of Signature/Review Items with IOAA:

Item	Status	Due Date/Anticipated Date
FRN – Cr6 Protocol	With IOAA. Sent 8/3.	No anticipated approval date.

ANP - AEP-AOP Case Study (Hines et al.)	This is an NHEERL-led paper with NCEA co-authors. Tina (as HHRA) transmitted to OW on 9/5. Have received feedback from R5, R10, and OW. Authors are currently working through comments, some significant.	Received comments.
